PROFESSIONAL SUMMARY

Product Designer specializing in user research, interaction design, and AI-powered digital products, with hands-on experience in cross-functional collaboration and problem-solving through research, prototyping, and testing. Recipient of the Best Overall Design Award from Design for America UW and multiple Dean's List honors.

EXPERIENCE

Experience Designer (Capstone), Electronic Arts | Seattle, WA | Jan 2026 – Jun 2026

- Researched player behavior and customer needs through 100+ survey responses and 10+ user interviews, identifying key pain points around information overload and decision-making in FC 26 Career Mode
- Translated research findings into key opportunity areas for Career Mode, designing AI-assisted decision support experiences for FC 26 Career Mode within a product ecosystem serving 9.8M daily active users
- Designed 4+ AI-assisted user flows and high-fidelity iOS prototypes to explain player changes, recommend lineups, and support squad decisions, translating complex game information into actionable player insights

Product Designer, CountOn | Remote | Jun 2024 – Aug 2024

- Designed 8+ responsive wireframes and interfaces for an AI-driven shopping assistant, restructuring information architecture and introducing comparison features to improve product discovery and decision-making
- Identified usability issues and guided product iterations through 10+ usability tests, WCAG accessibility reviews, heuristic evaluations, and 4+ competitive analyses, with close attention to detail across interaction and interface decisions
- Delivered UX improvements for a responsive AI e-Commerce experience, synthesizing research findings and presenting design recommendations to stakeholders

Summer Intern, PwC Korea (Samil PwC) | Seoul, Korea | Jul 2024 - Jul 2024

- Researched investment opportunities through market and financial analysis, synthesizing findings into 4+ executive-level insights to support strategic decision-making
- Conducted comparative analysis of 5+ global and domestic financial products, evaluating adoption trends, market positioning, and business performance to identify competitive opportunities
- Synthesized complex financial data into audit and valuation documentation, including NPL schedules and valuation-related reports, supporting internal analysis and client deliverables

EDUCATION

University of Washington, Seattle, WA | Sep 2022 – Jun 2026

Bachelor of Science in Human Centered Design & Engineering (HCDE), Minor in Informatics | GPA: 3.89/4

- Awards: Dean's List (Annual: 2023–2025; Quarterly: Winter & Spring 2026); Best Overall Design (Design for America UW 2024–2025)

PROJECTS

Project Designer, Design for America UW | Seattle, WA | Jan 2025 – May 2025

- Applied a user-centered design process to develop end-to-end UX for a virtual closet app, translating insights from 112 surveys and 17 interviews into product requirements and core user flows
- Built a cohesive visual design system using typography, hierarchy, and interaction patterns to improve wardrobe organization and interface consistency
- Iterated on prototypes through 10+ usability tests, improving usability and achieving a 4.1/5 user testing score

SKILLS

AI: Claude, Codex, Lovable, Cursor, Chat GPT

Tools: Figma, Adobe Creative Suite (Photoshop, Illustrator, InDesign), Framer, HTML/CSS, Tableau, RStudio, VS Code, Canva, Miro, SQL, Python, GitHub

Design Skills: Human-Computer Interaction (HCI), UX Research, UX Design, UI Design, Web Design, A/B Testing, Information Architecture, Prototyping, Wireframing, Data Visualization, Component Libraries
